Dear RES-Q+ partners, colleagues, supporters and friends,

Starting January 2023, we are happy to provide you with monthly Newsletter on the RES-Q+ Project. We will update you on main project information, news, planned meetings, deliverables and milestones, we met, etc. Moreover, we will introduce individuals, who are part of our RES-Q+ community, so we know each other better.

Did you know that Hendrik's passion is baking? And that he loves skating? Hendrik is the one who has initiated the RES-Q+ project and encouraged the RES-Q team to prepare a proposal in the Horizon Europe Programme. He has interconnected our clinical world with an IT world, and in our project, he plays an important part of Co-Leader and "Interpreter between clinicians and IT guys". You will learn more about Hendrik in this issue.

We hope you will find the Newsletter useful and enjoyable. Please, if you have anything to be published in the Newsletter, write our colleague katerina.hanusova@uzis.cz, who is in charge.

Thank you for your time, thank you for your contribution to this Newsletter and thank you for your effort you all put into our project. The picture from the Kick-off Meeting in Prague (see below) is a nice reminder of a great start of our project.

With kind regards,

Veronika Svobodova
(svobodova.stroke@gmail.com)
On behalf of the Project Management Team

Kick-off meeting Prague, 22.- 24.11. 2022

Get to know Hendrik!

Hendrik Knoche (52), associating professor at Aalborg University Faculty of IT and design and co-coordinator of RES-Q+ project. Thank you, Hendrik, for answering our questions!

1) Where do you come from and why did you choose your job?
I'm originally from Hamburg, Germany where I chose to study computer science because it was constantly innovating and while I liked math computer science didn't seem as dry. I later discovered that I didn't want to be a programmer who has little control over design decisions and the human factors interested me more and more. So I wrote my MSc thesis at UC San Diego's cognitive science department and then pursued a PhD in human centered systems design at University College London. Before settling on a research career in academia I tried and held many jobs from when I was 14 in: stocking supermarket shelves, delivering medication to patients, selling insurances, pre-print production, DJing, football game annotations and statistics, game designing, photographing sports, front- and backend data base development, and website information architectures.

2) Beside the project, what do you work on?
I teach about 50 % of my time, which I love. We engage our students in research in my case specifically purposeful games in VR and on mobile devices - mostly in health and rehabilitation contexts. I'm interested in designing interfaces for special needs populations. Illiterates, physically and cognitively challenged, e.g. stroke patients suffering from neglect.

3) We heard that you love to bake. What is your favorite meal and desert?
I love bagels, which you cannot buy fresh at bakeries in Denmark. So given time I bake those, Franzbrötchen (a specialty from Hamburg), and pizza.
Favorite meal: tom kha gai soup; favorite dessert: cheeses or something with poppy seeds.

4) What is your country like? What is great about it?
Denmark is an egalitarian (both in monetary and gender terms) and family oriented society. You cannot schedule meetings after 16:00 here. Like my hanseatic roots people are reserved and socially saturated (they grow up with their friends and are reluctant to move to other places) – so it's difficult to establish social networks.
Denmark feels very safe. People leave their babies outside their front door in their prams to sleep in the (cold) fresh air. I have not heard about any kidnapped babies.

5) What interesting qualities or characteristics do you have that most partners don't know about?
I'm usually not happy with 80% - I enjoy the remaining 15% after that I struggle with perfectionist expectations. I still occasionally find time to make music compilations. I used to be very into table top games but have little to no time left for that. I tremendously enjoy improving my skating - both on wheels and ice. OK, the latter are more hobby topics rather than qualities I guess.

6) What is your favorite superhero/fictive character and why?
I envy Sherlock Holmes his superpowers in perception and deduction.

Administrative information

RES-Q+ webpage

The project website is now live at www.resqplus.eu. You will be advised when and how to share the website by the dissemination team shortly. If you have any comments regarding the webpage, please contact Eliška.

RES-Q+ repository

The project RES-Q+ consortium uses **Google Workspace** as a main tool for online cooperation, document repository, shared calendar and mailing list communication. Please contact Petra Hrstková to provide access to the RES-Q+ Shared Drive. The Shared Folder with name "RES-Q+" appears under the "Shared Drives" left menu item on your Google Drive when shared with you.

Communication

To make communication easier within the main consortium bodies, the following mailing lists are available:

all@resqplus.eu – all participants
pga@resqplus.eu – General Assembly members
wpl@resqplus.eu – WP Leaders (Project Steering Committee)
eab@resqplus.eu – External Advisory Board members
eth@resqplus.eu – Ethics Board members
clinical@resqplus.eu – partner hospitals
admin@resqplus.eu – Administrative contacts
finance@resqplus.eu – Financial contacts

The full contact list with the project participants can be found on Shared Drive. The mailing lists contain emails of team members as indicated in the Contact list. **To add or remove team members, please, contact the Administration Team** (Eliška Stravová).

Deliverables status

First two WP9 deliverables - Minutes from the 1st GA meeting and Project management handbook – were submitted at the end of the year 2022.

This month the deliverable describing creation of the RES-Q+ website was successfully submitted. The website has been up and running for a few weeks now, since January 23 we have been using Matomo analysis to track the visits. The web page will be continuously updated and expanded, we suppose to add info about our members, news section, results section etc. Feel free to share the link! www.resqplus.eu
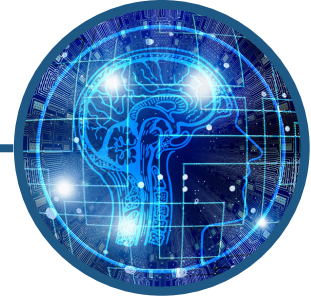

Reporting

During the RES-Q+ project implementation monthly reporting is scheduled. Each task leader and clinical partner provides short reporting at the end of each task in the project tracker.
Regular project meetings

Each first Friday of the month at 12:00 regular Monthly Project Steering Committee meetings are organized. Feel free to attend these meetings.

Planned Meetings

Administrative and Financial Project Management	**24. 1. 2023** at 1 PM CET *online*
All clinical partners	**February** (TBD) *online*
PSC monthly meeting	**every 1st Friday of the month** 12 PM CET *online*
PSC face to face meeting	**22. 5. 2023** 10 AM - 5 PM CET *Munich*

We'd like to thank Svetla and Todor from Ontotext for introducing a very interesting topic - **Knowledge graphs** to us. The initial training took place on Thursday January 19 and the record as well as the presentation are available on the RES-Q+ disc (folder 03_Consortium Meetings, sub-folder 03_Technical Meetings). Since the topic is very comprehensive and there were many questions, a follow-up training will be scheduled at the beginning of February.

Glossary of terms and abbreviations

As our communication often includes abbreviations that may not be completely clear to everyone, we include a glossary of terms in the newsletter:

GA	**General Assembly**	highest decision-making body of the project composed of the project coordinator Robert Mikulík and one representative of each partner
	Grant Agreement	agreement signed between the Coordinator and the EC
PSC	**Project Steering Committee**	operational body consisting of all WP Leaders and chaired by Robert Mikulík
EAB	**External Advisory Board**	external body that will advise the consortium regarding project strategy and monitor the project progress
DoA	**Description of the Action**	is transformed project proposal annexed to the Grant Agreement that contains the details of how the action (project) will be carried out
